

# Environment Monitor / first record

## Prepare

Identify your model and supported modes. Follow the supplied manual for power, placement, settling and operating limits.

## Read

Copy the displayed value and unit exactly. Add time, device ID, position and any recent movement.

## Check

Use unknown for missing units or settling status. A consumer display is not proof of accuracy or safe conditions. Consult the manual for model-specific questions.

### ONE USEFUL FINISH LINE

Save one identifiable photo pair or one reading with its original unit and context. This sheet is a short reference, not the complete paid guide.

## Want the full routine?

The \$19 Equipment Quickstart includes worked records, troubleshooting, worksheets and a CSV. The premium Playbook includes that guide plus AI examples and the field workbook. See [mastergrowbot.com/playbooks](https://mastergrowbot.com/playbooks).
