

Choose a tool. Finish one record.

Scout Camera	Pages 3-4: phone-lens handling and photo quality.
Environment Monitor	Page 5: exact display records and context.
Soil Health Meter	Page 6: preserve supported modes and original scales.
All equipment	Pages 7-10: records, comparisons and troubleshooting.
Your worksheet	Page 11; separate two-page fillable worksheets also included.

One useful first task

Capture a photo pair or record one display reading. Write the device ID, date/time, unit and limitation. Use the completed record on page 10 as your reference.

MANUAL FIRST

Confirm model-specific power, charging, compatibility, modes, calibration and limits in the manual supplied with your device. This guide adds an observation routine; it does not replace that manual.

Completed example / your reference

Illustrative record. Values demonstrate documentation only.

subject_id / session_id	P01 / P01_2026-10-04_0915
date / time	2026-10-04 / 09:15
question	Is the pale area visible in both photos?
overview_file / detail_file	P01_overview.jpg / P01_detail-A.jpg
reading / unit / device_id	22.4 / degrees C / Monitor-A
position / settling_status	desk / unknown
limitations	Uneven light; handheld photo; settling unknown
reviewed_note	Area visible in detail; overview too small to confirm
next_evidence	Matching overview and detail in even light
