

Scout Camera / first photo pair

Prepare

Check the manual for phone compatibility and attachment fit. Inspect the lens and clean only as instructed. Avoid forcing the attachment.

Capture

Save an overview that locates your feature and a readable detail. Use even light and a steady position. Keep the originals.

Record and check

Write subject ID, date/time, filenames, attachment and lighting. Inspect focus and context. Retake unreadable images; record the reason.

ONE USEFUL FINISH LINE

Save one identifiable photo pair or one reading with its original unit and context. This sheet is a short reference, not the complete paid guide.

Want the full routine?

The \$19 Equipment Quickstart includes worked records, troubleshooting, worksheets and a CSV. The premium Playbook includes that guide plus AI examples and the field workbook. See mastergrowbot.com/playbooks.
