

Soil Health Meter / first record

Prepare

Confirm supported measurements and modes in the supplied manual. Follow its handling, cleaning, placement and calibration instructions where applicable.

Read

Preserve the original value, mode and scale name. Add device ID, date/time and observation position.

Check

Do not treat an unlabeled scale as a percentage. Write unknown where the unit or mode is missing and check the manual.

ONE USEFUL FINISH LINE

Save one identifiable photo pair or one reading with its original unit and context. This sheet is a short reference, not the complete paid guide.

Want the full routine?

The \$19 Equipment Quickstart includes worked records, troubleshooting, worksheets and a CSV. The premium Playbook includes that guide plus AI examples and the field workbook. See mastergrowbot.com/playbooks.
