

Scout Camera / first photo pair

Overview + detail

Same subject. Readable feature. Original files.

Generic schematic, not a model-specific product drawing.

Prepare

Check the manual for phone compatibility and attachment fit. Inspect the lens and clean only as instructed. Avoid forcing the attachment.

Capture

Save an overview that locates your feature and a readable detail. Use even light and a steady position. Keep the originals.

Record and check

Write subject ID, date/time, filenames, attachment and lighting. Inspect focus and context. Retake unreadable images; record the reason.

YOUR FIRST EVIDENCE TASK

Save one photo pair or one reading. Add ID, date/time and the exact source. Missing context stays unknown. This free sheet orients one device; the paid guide adds worked records and worksheets.

Want the full routine?

The \$19 Equipment Quickstart includes worked records, troubleshooting, worksheets and a CSV. The premium Playbook includes that guide plus AI examples and the field workbook. See mastergrowbot.com/playbooks.
