

# Soil Health Meter / first record

## Value + original scale

Copy the display. Preserve unknowns. Check the manual.

Generic schematic, not a model-specific product drawing.

## Prepare

Confirm supported measurements and modes in the supplied manual. Follow its handling, cleaning, placement and calibration instructions where applicable.

## Read

Preserve the original value, mode and scale name. Add device ID, date/time and observation position.

## Check

Do not treat an unlabeled scale as a percentage. Write unknown where the unit or mode is missing and check the manual.

### YOUR FIRST EVIDENCE TASK

Save one photo pair or one reading. Add ID, date/time and the exact source. Missing context stays unknown. This free sheet orients one device; the paid guide adds worked records and worksheets.

## Want the full routine?

The \$19 Equipment Quickstart includes worked records, troubleshooting, worksheets and a CSV. The premium Playbook includes that guide plus AI examples and the field workbook. See [mastergrowbot.com/playbooks](https://mastergrowbot.com/playbooks).
